### Explanatory Note

The sole purpose of this Amendment No. 1 (this "Amendment") to MusclePharm Corporation's Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2013, filed with the Securities and Exchange Commission on August 14, 2013 (the "Form 10-Q"), is to correct an error in the calculation of sales concentration by customer for the six months Ended June 30, 2012 in Note 2 of the Consolidated Financial Statements. Specifically, Note 2, Subsection "Revenue Recognition" was revised to indicate that the percent of sales for the three largest customers for the three and six months ended June 30, 2013 was as follows:

Customer	Three Months Ended June 30,	
	2013	2012
A	25 %	33 %
B	11 %	8 %
C	6 %	1 %

Customer	Six Months Ended June 30,	
	2013	2012
A	29 %	40 %
B	11 %	11 %
C	6 %	17 %

The previously disclosed calculation for the three largest customers for the six months ended June 30, 2013 was 31%, 12%, and 6%, respectively. While customers A and B remained the same for the three months and six months ended basis, customer C changed for the three months ended June 30, 2012. The calculations are based on gross customer sales as a percent of gross sales for the applicable period.

No other modifications or changes have been made to the Form 10-Q. This Amendment speaks as of the original filing date of the Form 10-Q, does not reflect events that may have occurred subsequent to the original filing date and does not modify or update in any way disclosures made in the original Form 10-Q.

**Note 1: Nature of Operations and Basis of Presentation**

**Nature of Operations**

MusclePharm Corporation (the “Company”, “we”, “our”, or “MusclePharm”), was incorporated in the state of Nevada on August 4, 2006 under the name Tone in Twenty for the purpose of engaging in the business of providing personal fitness training using isometric techniques. The Company is headquartered in Denver, Colorado.

MusclePharm currently manufactures and markets a wide-ranging variety of high-quality sports nutrition products.

**Basis of Presentation**

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) and the rules and regulations of the U.S. Securities and Exchange Commission (“SEC”), as amended for interim financial information.

The financial information as of December 31, 2012 is derived from the audited financial statements presented in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012 and filed with the SEC on April 1, 2013. The unaudited interim consolidated financial statements should be read in conjunction with the Company’s Annual Report on Form 10-K, which contains the audited financial statements and notes thereto, together with Management’s Discussion and Analysis of Financial Condition and Results of Operations, for the years ended December 31, 2012 and 2011.

Certain information or footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted, pursuant to the rules and regulations of the SEC for interim financial reporting. Accordingly, they do not include all the information and footnotes necessary for a comprehensive presentation of financial position, results of operations, or cash flows. It is management’s opinion, however, that all material adjustments (consisting of normal recurring adjustments) have been made which are necessary for a fair financial statement presentation. The interim results for the six months ended June 30, 2013 are not necessarily indicative of results for the full fiscal year.

**Note 2: Summary of Significant Accounting Policies**

**Principles of Consolidation**

The consolidated financial statements include the accounts of MusclePharm Corporation and its wholly-owned subsidiary MusclePharm Canada Enterprises Corp (“MusclePharm Canada”). MusclePharm Canada began operations in April of 2012. All intercompany accounts and transactions between MusclePharm Corporation and MusclePharm Canada have been eliminated upon consolidation.

**Use of Estimates**

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

Making estimates requires management to exercise significant judgment. It is reasonably possible that the estimate of the effect of a condition, situation or set of circumstances that existed at the date of the financial statements, which management considered in formulating its estimate could change in the near term due to one or more future non-conforming events. Accordingly, the actual results could differ significantly from estimates.

**Risks and Uncertainties**

The Company operates in an industry that is subject to rapid change and intense competition. The Company’s operations will be subject to significant risk and uncertainties including financial, operational, technological, regulatory, industry adverse publicity and other risks, including the potential risk of business failure.

**MusclePharm Corporation and Subsidiary**  
**Notes to Consolidated Financial Statements**  
**(June 30, 2013)**  
**(Unaudited)**

**Cash and Cash Equivalents**

The Company considers all highly liquid instruments purchased with an original maturity of three months or less and money market accounts to be cash equivalents. At June 30, 2013 and December 31, 2012, respectively, the Company had no cash equivalents.

**Accounts Receivable and Allowance for Doubtful Accounts**

Accounts receivable represents trade obligations from customers that are subject to normal trade collection terms. Prior to July 1, the accounts receivable were sent directly to the Company's third party manufacturer and netted with any outstanding liabilities to the manufacturer (see Note 11). Liabilities to the manufacturer totaled \$4,213,394 at June 30, 2013 and are included in accounts payable and accrued liabilities. The Company periodically evaluates the collectability of its accounts receivable and considers the need to establish an allowance for doubtful accounts based upon historical collection experience and specific customer information. Accordingly, the actual amounts could vary from the recorded allowances. There is also a review of customer discounts at the period end and an accrual made for discounts earned but not yet received by quarter end.

Management reserves for bad debt expense based on the aging of accounts receivable. Bad debt expense is classified under general & administrative expense in the Consolidated Statement of Operations.

The Company does not charge interest on past due receivables. Receivables are determined to be past due based on the payment terms of the original invoices. Accounts receivable consisted of the following at June 30, 2013 and December 31, 2012:

	<b>As of June 30, 2013</b>	<b>As of December 31, 2012</b>
Accounts receivable	\$ 10,492,646	\$ 4,416,193
Less: allowance for discounts	(1,004,000)	(1,088,720)
Less: allowance for doubtful accounts	(253,552)	(25,129)
Accounts receivable – net	<u>\$ 9,235,094</u>	<u>\$ 3,302,344</u>

At June 30, 2013 and December 31, 2012, the Company had the following concentrations of accounts receivable with significant customers:

<b>Customer</b>	<b>As of June 30, 2013</b>	<b>As of December 31, 2012</b>
A	14 %	19 %
B	8 %	6 %
C	7 %	0 %

**Inventory**

Inventory is valued at the lower of cost or market value. Product-related inventories are primarily maintained using the average cost method.

**Prepaid Giveaways**

Prepaid giveaways represent non-inventory sample items, which are given away to aid in promotion of the brand.

**Prepaid Sponsorship Fees**

Prepaid sponsorship fees represents fees paid in connection with future advertising to be received.

**Property and Equipment**

Property and equipment are stated at cost and depreciated to their estimated residual value over their estimated useful lives. When assets are retired or otherwise disposed of, the assets and related accumulated depreciation are relieved from the accounts and the resulting gains or losses are included in operating income in the statements of operations. Repairs and maintenance costs are expensed as incurred. Depreciation is provided using the straight-line method for all property and equipment.

**MusclePharm Corporation and Subsidiary**  
**Notes to Consolidated Financial Statements**  
**(June 30, 2013)**  
**(Unaudited)**

**Website Development Costs**

Costs incurred in the planning stage of a website are expensed, while costs incurred in the development stage are capitalized and amortized over the estimated useful life of the asset.

**Long-Lived Assets**

The Company reviews long-lived assets for impairment whenever events or changes in circumstances, such as service discontinuance or technological obsolescence, indicate that the carrying amount of the long-lived asset may not be recoverable. When such events occur, the Company compares the carrying amount of the asset to the undiscounted expected future cash flows related to the asset. If the comparison indicates that impairment is present, the amount of the impairment is calculated as the difference between the excess of the carrying amount over the fair value of the asset. If a readily determinable market price does not exist, fair value is estimated using discounted expected cash flows attributable to the asset. During the six months ended June 30, 2013 and 2012, the Company recorded no impairment expense.

**Fair Value of Financial Instruments**

The Company measures assets and liabilities at fair value based on an expected exit price which represents the amount that would be received on the sale of an asset or paid to transfer a liability, as the case may be, in an orderly transaction between market participants. As such, fair value may be based on assumptions that market participants would use in pricing an asset or liability. The authoritative guidance on fair value measurements contains a consistent framework for measuring fair value on either a recurring or nonrecurring basis whereby inputs, used in valuation techniques, are assigned a hierarchical level.

The following are the hierarchical levels of inputs to measure fair value:

- Level 1: Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2: Inputs reflect quoted prices for identical assets or liabilities in markets that are not active; quoted prices for similar assets or liabilities in active markets; inputs other than quoted prices that are observable for the assets or liabilities; or inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3: Unobservable inputs reflecting the Company's assumptions incorporated in valuation techniques used to determine fair value. These assumptions are required to be consistent with market participant assumptions that are reasonably available.

The following are the major categories of liabilities measured at fair value on a recurring basis as of June 30, 2013 and December 31, 2012, using quoted prices in active markets for identical liabilities (Level 1); significant other observable inputs (Level 2); and significant unobservable inputs (Level 3):

	<u>As of June 30, 2013</u>	<u>As of December 31, 2012</u>
Derivative liabilities (Level 2)	\$ 2,369,032	\$ -

The Company's financial instruments consisted primarily of accounts receivable, accounts payable and accrued liabilities, and debt. The Company's debt approximates fair value based upon current borrowing rates available to the Company for debt with similar maturities. The carrying amounts of the Company's financial instruments generally approximated their fair values as of June 30, 2013 and December 31, 2012, respectively, due to the short-term nature of these instruments.

**Revenue Recognition**

The Company records revenue when all of the following have occurred: (1) persuasive evidence of an arrangement exists, (2) product has been shipped or delivered, (3) the sales price to the customer is fixed or determinable, and (4) collectability is reasonably assured.

Depending on individual customer agreements, sales are recognized either upon shipment of products to customers or upon delivery. For all of our Canadian sales, which represent 3% of total sales, recognition occurs upon shipment.

**MusclePharm Corporation and Subsidiary**  
**Notes to Consolidated Financial Statements**  
**(June 30, 2013)**  
**(Unaudited)**

The Company has determined that advertising related credits that are granted to customers fall within the guidance of ASC No. 605-50-55 (“Revenue Recognition” – Customer Payments and Incentives – Implementation Guidance and Illustrations). The guidance indicates that, absent evidence of benefit to the vendor, appropriate treatment requires netting these types of payments against revenues and not expensing as advertising expense.

The Company records sales allowances and discounts as a direct reduction of sales.

Sales for the three and six months ended June 30, 2013 and 2012 were as follows:

	<b>Three Months Ended June 30,</b>		<b>Six Months Ended June 30,</b>	
	<b>2013</b>	<b>2012</b>	<b>2013</b>	<b>2012</b>

The Company has an informal seven day right of return for products. There were nominal returns for the three and six months ended June 30, 2013 and 2012.

For the three and six months ended June 30, 2013 and 2012, the Company had the following concentrations of revenues with significant customers:

B	11 %	8 %

#### **Licensing Income and Royalty Revenue**

On May 5, 2011, the Company granted an exclusive indefinite license to market, manufacture, design and sell the Company’s existing apparel line. The licensee paid an initial fee of \$250,000 in June 2011, and will pay the Company a 10% net royalty based on its net income at the end of each fiscal year. To date, no royalty revenue has been earned by the Company.

#### **Cost of Sales**

Cost of sales represents costs directly related to the production, manufacturing and freight of the Company’s products.

#### **Shipping and Handling**

Until March 1, 2013 MusclePharm used a manufacturer from Tennessee to ship directly to our customers, and after that date MusclePharm took control of the shipping and began shipping product to our customers from a previously leased 152,000 square foot distribution center in Franklin, Tennessee in close proximity of our manufacturer. Our products are transported from our manufacturer to the MusclePharm distribution center, but title does not pass from the manufacturer until loaded on the truck for shipment. Through June 30, 2013, MusclePharm does not take title to our products (see Note 11). The facility in Franklin, Tennessee is operated with the Company’s equipment and employees. This transition away from having our Tennessee manufacturer ship product for us is an effort to reduce our costs and improve gross margins.

The Company also uses a manufacturer in New York for the manufacture of one of the Company’s products. These orders are typically large and heavy and are drop shipped directly to our customers at the time of order.

Costs associated to the shipments are recorded in cost of sales. For Canadian sales, the product is shipped from our Canadian warehouse to our customers. Costs associated with the shipments are recorded as shipping.

**Advertising**

The Company expenses advertising costs when incurred.

Advertising expense for the three and six months ended June 30, 2013 and 2012 were as follows:

	<b>Three Months Ended June 30,</b>		<b>Six Months Ended June 30,</b>	
	<b>2013</b>	<b>2012</b>	<b>2013</b>	<b>2012</b>
Advertising	\$ 3,275,200	\$ 2,044,005	\$ 5,592,577	\$ 3,976,840

**Beneficial Conversion Feature**

For conventional convertible debt where the rate of conversion is below market value, the Company records a “beneficial conversion feature” (“BCF”) and related debt discount.

When the Company records a BCF, the relative fair value of the BCF is recorded as a debt discount against the face amount of the respective debt instrument. The discount is amortized to interest expense over the life of the debt.

**Accounts payable and accrued liabilities**

Accounts payable and accrued liabilities consists of the Company’s trade payables as well as amounts estimated by management for future liability payments that relate to the current accounting period. Management reviews these estimates periodically to determine their reasonableness and fair presentation.

**Debt**

The Company defines short term debt as any debt payment due less than one year from the date of the financial statements. Long term debt is defined as any debt payment due more than one year from the date of the financial statements. Refer to Note 4 for further disclosure of debt liabilities.

**Derivative Liabilities**

Fair value accounting requires bifurcation of embedded derivative instruments such as conversion features in equity instruments and warrants granted, and measurement of their fair value. In determining the appropriate fair value, the Company uses the Black-Scholes option-pricing model. In assessing the convertible equity instruments, management determines if the convertible equity instrument is conventional convertible equity and further if the beneficial conversion feature requires separate measurement.

Once derivative liabilities are determined, they are adjusted to reflect fair value at the end of each reporting period. Any increase or decrease in the fair value is recorded in results of operations as an adjustment to fair value of derivatives. In addition, the fair value of freestanding derivative instruments such as warrants, are also valued using the Black-Scholes option-pricing model. Once a derivative liability ceases to exist any remaining fair value is reclassified to additional paid in capital.

**Deferred Equity Costs**

The Company may pay costs related to the underwriting and offering of equity securities. These costs are treated as a reduction to equity capital raised and recorded in equity when the share issuances are recorded. Until the shares are recorded or until offering is aborted, these costs will be held on the balance sheet as a deferred asset.

**Debt Issue Costs and Debt Discount**

The Company may pay debt issue costs, and record debt discounts in connection with raising funds through the issuance of debt. These costs are amortized over the life of the debt to interest expense. If a conversion of the underlying debt occurs, a proportionate share of the unamortized amounts is immediately expensed.

**MusclePharm Corporation and Subsidiary**  
**Notes to Consolidated Financial Statements**  
**(June 30, 2013)**  
**(Unaudited)**

**Original Issue Discount**

For certain convertible debt issued, the Company provides the debt holder with an original issue discount. The original issue discount is recorded to debt discount and additional paid-in capital at an amount not to exceed gross proceeds raised, reducing the face amount of the debt, and is amortized to interest expense over the life of the debt.

**Share-Based Payments**

Generally, all forms of share-based payments, including stock option grants, warrants and restricted stock grants and stock appreciation rights are measured at their fair value on the awards' grant date, based on estimated number of awards that are ultimately expected to vest. Share-based compensation awards issued to non-employees for services rendered are recorded at either the fair value of the services rendered or the fair value of the share-based payment, whichever is more readily determinable.

**Earnings (loss) Per Share**

Net earnings (loss) per share is computed by dividing net income (loss) for the period by the weighted average number of shares of common stock outstanding during each period. Diluted earnings (loss) per share is computed by dividing net income (loss) for the period by the weighted average number of shares of common stock, common stock equivalents and potentially dilutive securities outstanding during each period.

The Company uses an "if converted" method to determine whether there is a dilutive effect of outstanding option and warrant contracts. For the three months ended June 30, 2012, all of the Company's convertible debt options and 625,028 warrants had exercise prices below of the Company's period end market price of the common stock into which they convert. The adjusted dilutive net loss reflects the add back of approximately \$349 of interest expense related to the convertible debt and the reduction of \$9,449,050 of gains on derivative contracts for the three months ended June 30, 2012. For the three months ended June 30, 2013 and six months ended June 30, 2013 and 2012, and the three months ended June 30, 2012 the Company reflected net loss and a dilutive net loss, respectively, and the effect of considering any common stock equivalents would have been anti-dilutive for these periods. Therefore, separate computation of diluted earnings (loss) per share is not presented.

The Company has the following common stock equivalents for the six months ended June 30, 2013 and 2012, respectively:

	<b>Six Months Ended June 30,</b>	
	<b>2013</b>	<b>2012</b>
Stock options (exercise price - \$425/share)	670	1,903
Warrants (exercise price \$4 – \$1,275/share)	330,089	84,820
Convertible debt (exercise price \$17/share)	-	2,471
Total common stock equivalents	<u>330,759</u>	<u>89,194</u>

In the above table, some of the outstanding instruments from 2013 and 2012 contain ratchet provisions that would cause variability in the exercise price at the balance sheet date. As a result, common stock equivalents could change at each reporting period.

**Foreign Currency**

MusclePharm began operations in Canada in April of 2012. The Canadian Dollar was determined to be the functional currency as the majority of the transactions related to the day to day operations of the business are exchanged in Canadian Dollars. At the end of the period, the financial results of the Canadian operation are translated into United States Dollars, which is our reporting currency, and added to the U.S. operations for consolidated company financial results. The revenue and expense items are translated using the average rate for the period and the assets and liabilities at the end of period rate. Transactions that have completed the accounting cycle and resulted in a gain or loss related to translation are recorded in realized gain or loss due to foreign currency translation under other income expense on the income statement. Transactions that have not completed their accounting cycle but appear to have gain or loss due to the translation process are recorded as unrealized gain or loss due to translation and held in the equity section on the balance sheet until such date the accounting cycle of the transaction is complete and the actual realized gain or loss is recognized.

	<u>As of June 30, 2013</u>	<u>As of December 31, 2012</u>

**Convertible Debt – Secured - Derivative Liabilities**

During the year ended December 31, 2012, the Company issued convertible debt totaling \$519,950. The convertible debt includes the following terms:

		Year Ended December 31, 2012 Amount of Principal Raised
Interest Rate		8% - 10%
Default interest rate		0% - 20%
Maturity		January 3, 2012 to October 11, 2014
Conversion terms 1	62% of lowest trade price for the last 7 trading days	100,000
Conversion terms 2	65% of the lowest trade price in the 30 trading days previous to the conversion	19,950
Conversion terms 3	35% multiplied by the average of the lowest three (3) trading prices (as defined below) for the common stock during the ten (10) trading day period ending on the latest complete trading day prior to the conversion date.	400,000
		<u>\$ 519,950</u>

The debt holders are entitled, at their option, to convert all or part of the principal and accrued interest into shares of the Company's common stock at the conversion prices and terms discussed above. The Company classifies embedded conversion features in these notes as a derivative liability due to management's assessment that the Company may not have sufficient authorized number of shares of common stock required to net-share settle or due to the existence of a ratchet due to an anti-dilution provision. See Note 5 regarding accounting for derivative liabilities.

During the six months ended June 30, 2013 and 2012, the Company amortized \$335,433 and \$184,031, respectively in debt issue costs.

**Note 5: Derivative Liabilities**

The Company identified conversion features embedded within consulting agreements and Series D Preferred Stock issued in 2013. The Company has determined that the features associated with the embedded conversion option should be accounted for at fair value as a derivative liability as the Company could not determine if a sufficient number of shares would be available to settle all transactions.

The fair value of the conversion feature is summarized as follows:

<b>Derivative liability - December 31, 2012</b>	\$ -
Fair value at the commitment date for equity instruments	8,175,459
Fair value at the commitment date for warrants issued	96,913
Fair value mark to market adjustment for equity instruments	5,716,688
Fair value mark to market adjustment for warrants	55,275
Conversion instruments exercised	(11,675,303)
<b>Derivative liability – June 30, 2013</b>	<b>\$ 2,369,032</b>

The Company recorded the day 1 value of derivative contracts associated with the Series D preferred stock issuance against gross proceeds raised, and expensed immediately the remaining value of the derivative as it exceeded the gross proceeds of the offering. The Company recorded a derivative expense of \$96,913 and \$2,486,451 for the six months ended June 30, 2013 and 2012, respectively.

The fair value at the commitment and re-measurement dates for the Company's derivative liabilities were based upon the following management assumptions:

	<b>Commitment Date</b>	<b>Re-measurement Date</b>
Expected dividends	0 %	0 %
Expected volatility	118% - 123 %	107 %
Expected term:	1 year	17 months – 1 year
Risk free interest rate	0.14% - 0.15%	0.15 %

**Note 6: Restricted Stock Units**

In November 2012, the Company granted the Executive Vice President and Co-Chairman, Mr. John H. Blucher, 70,589 restricted stock units through a restricted stock unit agreement. Each restricted stock unit represents a contingent right to receive one share of the Company's common stock upon vesting. The value of this award at the grant date was \$245,400 and will be amortized over the vesting periods such that each tranche of restricted stock units will be fully amortized at the date of vesting. The restricted stock units vest in one tranche of 23,529 on January 1, 2013 and two tranches of 23,530 shares on January 1, 2014 and December 1, 2014. As of June 30, 2013, 23,529 restricted stock units have vested and the unamortized portion of this award is \$123,036.

In November 2012, the Company granted the Chief Financial Officer, Mr. L. Gary Davis, 58,824 restricted stock units through a restricted stock unit agreement. Each restricted stock unit represents a contingent right to receive one share of the Company's common stock upon vesting. The value of this award at the grant date was \$204,500 and will be amortized over the vesting periods such that each tranche of restricted stock units will be fully amortized at the date of vesting. The restricted stock units vest in three tranches of 19,608 shares each on January 1, 2013 and 2014, and December 1, 2014. As of June 30, 2013, 19,608 restricted stock units have vested and the unamortized portion of this award is \$102,530.

**Note 7: Stockholders' Equity**

The Company has four separate series of authorized preferred stock:

On November 26, 2012, the Company (i) effected a 1-for-850 reverse stock split of our common stock, including a proportionate reduction in the number of authorized shares of our common stock from 2.36 billion shares to 2.8 million shares of common stock, and (ii) amended our articles of incorporation to increase the number of authorized shares of common stock (post reverse stock split) from 2,941,177 to 100 million effective November 27, 2012. All share and per share amounts in this document have been changed to give effect to the reverse stock split.

**(A) Series A Convertible Preferred Stock**

This class of stock has the following provisions:

- Non-voting,
- No rights to dividends,
- No liquidation value, and
- Convertible into 200 shares of common stock.

**(B) Series B Preferred Stock (Related Parties)**

In August 2011, the Company issued an aggregate of 51 shares of Series B Preferred Stock to two of its officers. The Company accounted for the share issuance at par value as there was no future economic value that could be associated with the issuance.

This class of stock has the following provisions:

- Voting rights entitling the holders to an aggregate 51% voting control,
- No rights to dividends,
- Stated value of \$0.001 per share,
- Liquidation rights entitle the receipt of net assets on a pro-rata basis with the holders of our common stock; and
- Non-convertible.

**(C) Series C Convertible Preferred Stock**

In October 2011, the Company issued 190 shares of Series C Convertible Preferred Stock, having a fair value of \$190,000. Of the total shares issued, 100 shares were issued for \$100,000 (\$1,000 /share). The remaining 90 shares were issued for services rendered having a fair value of \$90,000 (\$1,000 /share), based upon the stated value per share. In March 2012, all 190 shares were converted into 22,353 shares of the Company's common stock at a conversion price of \$0.0085 per share and a loss of \$614,984.

This class of stock has the following provisions:

- Stated Value - \$1,000 per share,
- Non-voting,
- Liquidation rights entitle an amount equal to the stated value, plus any accrued and unpaid dividends,
- As long as any Series C, Convertible Preferred Stock is outstanding, the Company is prohibited from executing various corporate actions without the majority consent of the holders of Series C, Convertible Preferred Stockholders authorization; and
- Convertible at the higher of (a) \$0.01 or (b) such price that is a 50% discount to market using the average of the low two closing bid prices, five days preceding conversion.

Due to the existence of an option to convert at a variable amount, the Company treated this series of preferred stock as a derivative liability due to the potential for settlement in a variable quantity of shares. Additionally, the Company computed the fair value of the derivative liability at the commitment date and re-measurement date, which was \$293 and \$175, respectively, using the Black-Scholes assumptions below. This transaction is analogous to a dividend with a direct charge to retained earnings.

**(D) Series D Convertible Preferred Stock**

Pursuant to the Certificate of Designation of the Series D Convertible Preferred Stock filed with the Nevada Secretary of State on January 11, 2013 (the "Certificate of Designation"), each share of Preferred Stock is convertible into two shares of common stock, subject to adjustment as set forth in the Certificate of Designation.

The shares of Series D have the following provisions:

- Voting rights based on number of common shares of conversion option;
- Initially no rights to dividends;
- Liquidation rights entitle an amount equal to the stated value, plus any accrued and unpaid dividends,
- Convertible into 2 shares of common stock, subject to adjustment.

**(E) Common Stock**

During the six months ended June 30, 2013, the Company issued the following common stock:

Transaction Type	Quantity (#)	Valuation (\$)	Range of Value per Share (\$)

Cash and warrants	953,236	8,059,330	8.26 – 9.32

<b>Total</b>	<b>4,988,355</b>	<b>29,894,534</b>	<b>2.80 – 12.99</b>

The fair value of all stock issuances above is based upon either the quoted closing trading price on the date of issuance, the value of derivative instrument at the date of conversion, contract value where the fair value was stated by the contract, or net proceeds from capital raised after giving effect to the cost of capital raised.

**(F) Stock Options**

The Company applied fair value accounting for all shares based payments awards. The fair value of each option granted is estimated on the date of grant using the Black-Scholes option-pricing model. #### *Sales - gross*

Gross sales increased approximately \$9.6 million or 51% to \$28,516,000 for the three months ended June 30, 2013, compared to \$18,869,000 for the three months ended June 30, 2012. The increase in sales was due primarily to increased awareness of our product brand, combined with hiring additional sales and marketing staff, and adding new products in an effort to expand our customer base. Since inception, we have focused on an aggressive marketing plan to penetrate the market. As such, significant promotional expenditures have been made to increase product sales through adding new customers and expanding our product line.

In this quarter the Company launched a women’s line named FitMiss. The momentum is beginning to show increasing sales for this new product line. The Company believes it has a good position for market share with a women’s line of products. The Company is also considering other new products. Overall as a direct result of our aggressive marketing plan, our products are currently being offered in more retail stores, both domestically and internationally, receiving better shelf placement, and receiving recognized awards compared to the prior period. At the 2012 Bodybuilding.com Supplement Awards, we received three Awards of Excellence; (i) the “Brand of the Year” award, (ii) the “Packaging of the Year” award, and (iii) the “Pre-Workout Supplement of the Year” award for Assault<sup>TM</sup>, and MusclePharm remains the product of choice for the Ultimate Fighting Championship, UFC.

#### *Discounts and sales allowances*

Discounts and sales allowances for the three months ended June 30, 2013 decreased to approximately \$3,035,000 or 10.6% of gross sales as compared to \$3,440,000 or 18.2% of gross sales for the three months ended June 30, 2012. This decrease in discounts and allowances is a result driven by continued efforts to place controls around discounting and greater efforts to define customer terms and allowances.

### *Sales - net*

Net sales increased approximately \$10.1 million or 65% to \$25,480,000 for the three months ended June 30, 2013, compared to \$15,429,000 for the three months ended June 30, 2012. A significant growth area for the Company was nutritional product sales in international markets. International sales are included in the results of operations and increased approximately \$3.5 million or 56% to \$9,833,000 for the three months ended June 30, 2013, compared to \$6,302,000 for the three months ended June 30, 2012.

### *Gross Profit*

Gross profit increased approximately \$5.4 million or 218% to \$7,913,000 for the three months ended June 30, 2013, compared to \$2,487,000 for the three months ended June 30, 2012. The gross profit percentage increased to approximately 31% of net sales during the three months ended June 30, 2013, from 16% for the three months ended June 30, 2012. This increase was primarily due to the reduction in discounts as a percentage of sales, new product pricing from our Tennessee manufacturer, and the reduction of shipping costs. As discussed in Note 2 of the financial statements for shipping, the Company is handling its own shipping and has decreased the cost to ship product to the customer thereby increasing gross profit. Shipping expense for the three months ended June 30, 2013 was 2.6% of net sales down from 3.2% of net sales for the three months ended June 30, 2012.

For the three months ended June 30, 2013 the discounts as a percentage of gross sales was 10.6% compared to the three months ended June 30, 2012 of 18.2%. We have also experienced a decrease in cost of goods sold as a result of improved product pricing. For the three months ended June 30, 2013 the cost of goods as a percentage to sales was 69% compared to the three months ended June 30, 2012 of 84%. We expect to focus on streamlining our operations and seek operating efficiencies in order to further improve our gross profit percentage.

### *General and Administrative Expenses*

General and administrative (“G&A”) expenses for the three months ended June 30, 2013, increased to approximately \$10,654,000, compared to approximately \$4,151,000 for the three months ended June 30, 2012 a 157% increase. Part of the reason for this increase in G&A is two consulting contracts of GRQ and Melechdavid. These contracts, categorized in the table below as professional fees, were entered into by the Company to promote the growth and expansion necessary to expand and raise capital and repay the previous existing debt by which the Company was encumbered. The total amount booked as expense for these advisory contracts in the second quarter of 2013 totaled approximately \$3.0 million and these contracts were satisfied as explained in Note 7 Stockholder’s Equity. This expense represents 46% of the total increase in the general and administrative expenses. The Company’s obligations under the GRQ and Melechdavid agreements were completely satisfied as of July 12, 2013 and the agreements have not been renewed or extended.

The 65% increase in sales necessitated increases in our general and administrative expenses and included \$1,231,000 in the area of advertising and promotions used to promote brand and product awareness. We expect as we continue to promote our brand and products, these areas and levels of promotion will hold steady or increase relative to overall efforts to increase product awareness and sales.

Another area of increase is consulting expenses of \$567,000 related to consulting on a variety of matters including investor relations, product research and development, product certifications, capital acquisition, and debt retirement.

The \$6.5 million increase in general and administrative expenses including the significant items listed above were partially offset by the decrease of \$182,000 in stock based compensation.

The following table provides an overview of expense categories and percentage of net revenue:

	<b>Three Months Ended June 30,</b>			
	<b>2013</b>	<b>% of Revenue</b>	<b>2012</b>	<b>% of Revenue</b>

Salary and Wage Expense	1,597,410	6.30 %	196,440	1.30 %
<b>Total G&amp;A Expense</b>	<b>\$ 10,654,272</b>	<b>41.80 %</b>	<b>\$ 4,151,076</b>	<b>26.90 %</b>

### *Loss from Operations*

The net loss from operations for the three months ended June 30, 2013, was approximately \$2,741,000, compared to a net loss of approximately \$1,664,000 for the three months ended June 30, 2012.

Other income	\$ (104)	\$ (1,573)
Total other expenses	\$ 319,123	\$ 7,846,245

### **Net (Loss) Income**

For the foregoing reasons, we had a net loss of approximately \$2,422,000 for the three months ended June 30, 2013, compared to net income of approximately \$6,182,000 for the three months ended June 30, 2012.

Inflation did not have a material impact on our operations for the period. Other than the foregoing, management knows of no trends, demands, or uncertainties that are reasonably likely to have a material impact on our results of operations.

We have also experienced a decrease in cost of goods sold as a result of improved product pricing. For the six months ended June 30, 2013 the cost of goods as a percentage to sales was 67% compared to the six months ended June 30, 2012 of 81%. We expect to focus on streamlining our operations and seek operating efficiencies in order to further improve our gross profit percentage.

#### ***General and Administrative Expenses***

General and administrative ("G&A") expenses for the six months ended June 30, 2013, increased to approximately \$19,541,000, compared to approximately \$8,544,000 for the six months ended June 30, 2012 a 129%, increase. A primary reason for this increase in G&A is two consulting contracts of GRQ and Melechdavid. These contracts, categorized in the table below as professional fees, were entered into by the Company to promote the growth and expansion necessary to expand and raise capital and repay the previous existing debt by which the Company was encumbered. The total amount booked as expense for these advisory contracts in the first half of 2013 totaled approximately \$6,592,000 and these contracts were satisfied as explained in Note 7 Stockholder's Equity. This expense represents 60% of the total increase in the general and administrative expenses. The Company's obligations under the GRQ and Melechdavid agreements were completely satisfied as of July 12, 2013 and the agreements have not been renewed or extended.

The 50% increase in sales necessitated increases in our general and administrative expenses and included \$1,616,000 in the area of advertising and promotions used to promote brand and product awareness. We expect as we continue to promote our brand and products, these areas and levels of promotion will hold steady or increase relative to overall efforts to increase product awareness and sales. This increase was partially offset by a decrease in apparel and athlete endorsement/sponsorship of \$307,000. Another area of increase is legal fees of \$276,000 related to efforts required to obtain financing and dispute resolutions.

The \$11 million increase in general and administrative expenses including the significant items listed above were partially offset by the decrease of \$342,000 in stock based compensation.

The following table provides an overview of expense categories and percentage of net revenue:

	<b>Six Months Ended June 30,</b>			
	<b>2013</b>	<b>% of Revenue</b>	<b>2012</b>	<b>% of Revenue</b>

During the six months ended June 30, 2013, the Company issued warrants to convert 1,500,000 shares of preferred stock into 3,000,000 shares of common stock. <b>Total other expenses</b>	<b>\$ (6,321,379)</b>	<b>\$ (7,461,755)</b>

### ***Net Loss***

For the foregoing reasons, we had a net loss of approximately \$9,784,000 for the six months ended June 30, 2013, compared to approximately \$9,853,000 for the six months ended June 30, 2012.

Inflation did not have a material impact on our operations for the period. Other than the foregoing, management knows of no trends, demands, or uncertainties that are reasonably likely to have a material impact on our results of operations.

### **Liquidity and Capital Resources**

The following table summarizes total current assets, liabilities and working capital at June 30, 2013, compared to December 31, 2012.

	<u>June 30, 2013</u>	<u>December 31, 2012</u>	<u>Increase/Decrease</u>

Working Capital (Deficit)	\$ 11,107,254	\$ (11,570,575)	\$ 22,677,829

Our primary source of operating cash has been through the sale of equity and through the issuance of convertible secured promissory notes and other short-term debt as discussed below.

The Company's management believes current levels of liquidity are sufficient for current operations, but additional capital may be needed to execute the business plan, which includes buying more inventory. There can be no assurance that such capital will be available on acceptable terms or at all.

On March 27, 2013, MusclePharm sold an aggregate of 703,236 shares of its common stock, \$0.001 par value per share at a per share price of \$8.50 in a private placement to certain accredited investors for an aggregate purchase price of approximately \$5,977,506, thereby providing working capital.

The common stock was sold pursuant to subscription agreements dated March 27, 2013 between the Company and the Purchasers. The Subscription Agreements contained customary terms regarding, among other things, representations and warranties and indemnification.

On May 6, 2013, MusclePharm sold an aggregate of 100,000 shares of its common stock, \$0.001 par value per share at a per share price of \$8.50 in a private placement to certain accredited investors, thereby providing working capital.

The common stock was sold pursuant to subscription agreements dated May 6, 2013 between the Company and the Purchasers. The Subscription Agreements contained customary terms regarding, among other things, representations and warranties and indemnification.

On June 3, 2013, MusclePharm sold an aggregate of 150,000 shares of its common stock, \$0.001 par value per share at a per share price of \$10.00 in a private placement to certain accredited investors, for an aggregate purchase price of approximately \$1,398,139 thereby providing working capital.

The common stock was sold pursuant to subscription agreements dated June 3, 2013 between the Company and the Purchasers. The Subscription Agreements contained customary terms regarding, among other things, representations and warranties and indemnification.

At June 30, 2013, we had cash of \$8,656,000 and working capital of approximately \$11,107,000 compared to cash of \$0 and a working capital deficit of approximately \$11,571,000 at December 31, 2012. The working capital increase of approximately \$22,678,000 was primarily due to a net increase in cash of \$8,656,000, an increase in accounts receivable of \$5,933,000 and a decrease in current liabilities of \$5,879,000.

Cash used in operating activities was \$5,164,810 for the six months ended June 30, 2013, as compared to cash provided by operating activities of \$438,007 for the six months ended June 30, 2012. The increase in cash used in operating activities of approximately \$5.6 million for the six months ended June 30, 2013, compared to the six months ended June 30, 2012, was primarily due to an increase in accounts receivable and prepaid expense of approximately \$7.6 million, an increase in the amortization of prepaid stock compensation of \$2.9 million, a decrease in customer deposits of approximately \$1.5 million, a decrease in depreciation and amortization expense of approximately \$2.7 million, and a decrease on loss on settlement of approximately \$3.3 million offset by a decrease in derivative expense and change in fair value of derivatives of approximately \$4.9 million, a decrease in inventory of approximately \$0.3 million, a decrease in accounts payable and accrued liabilities of approximately \$1.2 million and a decrease in net loss of approximately \$70,000.

Cash used in investing activities decreased to \$353,566 from \$579,859 for the six months ended June 30, 2013 and 2012, due to slightly lower spending on fixed assets. Future investments in property and equipment, as well as further development of our Internet presence will largely depend on available capital resources.

Cash flows provided by financing activities were \$14,168,061 for the six months ended June 30, 2013, compared to cash flows used in financing activities of \$266,660 for the six months ended June 30, 2012. The approximately \$14.4 million increase was due to primarily to the net increase of approximately \$18.4 million net proceeds from equity offerings, a decrease of approximately \$0.4 million in the repurchase of common stock and a decrease of approximately \$0.1 million in debt issue costs offset by a decrease of approximately \$4.1 million in proceeds from issuance of debt and an increase in debt repayment of approximately \$0.3 million.

## Critical Accounting Policies and Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

Making estimates requires management to exercise significant judgment. It is at least reasonably possible that the estimate of the effect of a condition, situation or set of circumstances that existed at the date of the financial statements, which management considered in formulating its estimate could change in the near term due to one or more future non-conforming events. Accordingly, the actual results could differ significantly from estimates.

### Accounts Receivable and Allowance for Doubtful Accounts

Accounts receivable represents trade obligations from customers that are subject to normal trade collection terms. We periodically evaluate the collectability of our accounts receivable and considers the need to establish an allowance for doubtful accounts based upon historical collection experience and specific customer information. Accordingly, the actual amounts could vary from the recorded allowances.

We perform ongoing evaluations of our customers' financial condition and generally do not require collateral. Management reviews accounts receivable periodically and reduces the carrying amount by a valuation allowance that reflects management's best estimate of amounts that may not be collectible. Allowances, if any, for uncollectible accounts receivable are determined based upon information available and historical experience.

We do not charge interest on past due receivables. Receivables are determined to be past due based on the payment terms of the original invoices.

### Fair Value of Financial Instruments

We measure assets and liabilities at fair value based on an expected exit price as defined by the authoritative guidance on fair value measurements, which represents the amount that would be received on the sale of an asset or paid to transfer a liability, as the case may be, in an orderly transaction between market participants. As such, fair value may be based on assumptions that market participants would use in pricing an asset or liability. The authoritative guidance on fair value measurements establishes a consistent framework for measuring fair value on either a recurring or nonrecurring basis whereby inputs, used in valuation techniques, are assigned a hierarchical level.

The following are the hierarchical levels of inputs to measure fair value:

- Level 1: Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2: Inputs reflect quoted prices for identical assets or liabilities in markets that are not active; quoted prices for similar assets or liabilities in active markets; inputs other than quoted prices that are observable for the assets or liabilities; or inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3: Unobservable inputs reflecting our assumptions incorporated in valuation techniques used to determine fair value. These assumptions are required to be consistent with market participant assumptions that are reasonably available.

## **Revenue Recognition**

We record revenue when all of the following have occurred: (1) persuasive evidence of an arrangement exists, (2) product has been shipped or delivered, (3) the sales price to the customer is fixed or determinable, and (4) collectability is reasonably assured.

Depending on individual customer agreements, sales are recognized either upon shipment of products to customers or upon delivery. We record sales allowances and discounts as a direct reduction of sales.

We have determined that advertising related credits that were granted to customers fell within the guidance of ASC No. 605-50-55 ("*Revenue Recognition*" – *Customer Payments and Incentives – Implementation Guidance and Illustrations*). The guidance indicates that, absent evidence of benefit to the vendor, appropriate treatment requires netting these types of payments against revenues and not expensing as advertising expense.

We have an informal seven day right to return products. There were nominal returns at the six month periods ended June 30, 2013 and 2012.

## **Foreign Currency**

We began operations in Canada in April 2012. The Canadian Dollar was determined to be the functional currency as the majority of the transactions related to the day to day operations of the business are exchanged in Canadian Dollars. At the end of the period, the financial results of the Canadian operation are translated into United States Dollars, which is the reporting currency, and added to the U.S. operations for consolidated company financial results. The revenue and expense items are translated using the average rate for the period and the assets and liabilities at the end of period rate. Transactions that have completed the accounting cycle and resulted in a gain or loss related to translation are recorded in realized gain or loss due to foreign currency translation under other income expense on the income statement. Transactions that have not completed their accounting cycle but appear to have gain or loss due to the translation process are recorded as unrealized gain or loss due to translation and held in the equity section on the balance sheet until such date the accounting cycle of a transaction is complete and the actual realized gain or loss is recognized.

## **Beneficial Conversion Feature**

For conventional convertible debt where the rate of conversion is below market value, we record a "beneficial conversion feature" ("BCF") and related debt discount.

When we record a BCF, the relative fair value of the BCF would be recorded as a debt discount against the face amount of the respective debt instrument. The discount would be amortized to interest expense over the life of the debt.

## **Derivative Liabilities**

Fair value accounting requires bifurcation of embedded derivative instruments such as conversion features in convertible debt or equity instruments, and measurement of their fair value for accounting purposes. In determining the appropriate fair value, we use the Black-Scholes option-pricing model. In assessing the convertible debt instruments, management determines if the convertible debt host instrument is conventional convertible debt and further if there is a beneficial conversion feature requiring measurement. If the instrument is not considered conventional convertible debt, we will continue our evaluation process of these instruments as derivative financial instruments.

Once determined, derivative liabilities are adjusted to reflect fair value at each reporting period end, with any increase or decrease in the fair value being recorded in results of operations as an adjustment to fair value of derivatives. In addition, the fair value of freestanding derivative instruments such as warrants, are also valued using the Black-Scholes option-pricing model.

## **Debt Issue Costs and Debt Discount**

We may pay debt issue costs, and record debt discounts in connection with raising funds through the issuance of convertible debt. These costs are amortized over the life of the debt to interest expense. If a conversion of the underlying debt occurs, a proportionate share of the unamortized amounts is immediately expensed.

## **Original Issue Discount**

For certain convertible debt issued, we provide the debt holder with an original issue discount. The original issue discount is recorded to debt discount and additional paid in capital at an amount not to exceed gross proceeds raised, reducing the face amount of the note and is amortized to interest expense over the life of the debt.

## Share-Based Payments

Generally, all forms of share-based payments, including stock option grants, warrants, restricted stock grants and stock appreciation rights are measured at their fair value on the awards' grant date, based on estimated number of awards that are ultimately expected to vest. Share-based compensation awards issued to non-employees for services rendered are recorded at either the fair value of the services rendered or the fair value of the share-based payment, whichever is more readily determinable.
