

Financial Tearsheet

Company Overview

American Battery Metal Corporation (OTC: ABML) is a start-up, lithium exploration mining company whose purpose is to explore mineral properties, which hopefully will contain lithium and other economic minerals. We were incorporated under the laws of the State of Nevada on October 6, 2011 for the purpose of acquiring rights to mineral properties with the eventual objective of being a producing mineral company, if and when it ever occurs. We have limited operating history and have not yet generated or realized any revenues from our activities. Our principal executive offices are located at 930 Tahoe Blvd., Suite 802-16, Incline Village, NV 89451. On May 3, 2019, the Company changed it's name to American Battery Metals Corporation and reorganized into three divisions; Battery Metals Mining, Battery Metals Extraction and Battery Metals Recycling.
